LESSON PLAN

For

Generative AI for Agile Project Management (C324)

Course Code: C324

Conducted by

Tertiary Infotech Academy Pte Ltd

UEN: 201200696W

Version 1.0

DOCUMENT VERSION CONTROL RECORD

Version Number	Effective Date of Release	Summary of Included Changes	Author
1.0	27 July 2026	Initial release — C324 Generative AI for Agile Project Management courseware.	Dr. Alfred Ang

TABLE OF CONTENTS

Course Information.....	4
Learning Outcomes.....	4
Learning Reinforcement.....	4
Course Schedule.....	5
Day 1 — Stand up the Tempo 2.0 delivery on an AI toolkit — set up ChatGPT, Claude and Gemini for agile work, build a reusable prompt library and a responsible-AI checklist, then draft and refine the user stories, groom and prioritise the product backlog, and plan the first sprint with a release roadmap.....	5
Day 2 — Run and close out the Tempo 2.0 sprints with AI — summarise stand-ups and track progress, surface risks, blockers and dependencies, assist documentation, communication and testing, then generate status reports and a dashboard, analyse velocity, and run an AI-assisted retrospective that drives a real continuous-improvement plan.....	6
Lab Reference (aligned to course topics).....	7

Course Information

Course Title	Generative AI for Agile Project Management (C324)
Course Reference	C324
Training Provider	Tertiary Infotech Academy Pte Ltd (UEN 201200696W)
Duration	2 days · 7.5 instructional hours per day (15 hours)
Daily Timing	9:30 am – 6:30 pm (1-hour lunch; tea breaks within training time)
Mode	Instructor-led, hands-on practical labs
Trainer	Dr. Alfred Ang

Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Explain how generative AI assistants (ChatGPT, Claude, Gemini) support Agile and Scrum, and set up an AI toolkit and workspace for agile project management.
- LO2: Write effective, structured prompts for agile tasks and build a reusable prompt library the whole team can use.
- LO3: Apply responsible, human-in-the-loop AI practices — reviewing, fact-checking and protecting sensitive data — across agile work.
- LO4: Draft and refine clear, INVEST-quality user stories and acceptance criteria with AI assistance.
- LO5: Groom and prioritise a product backlog with AI using INVEST, MoSCoW and value-versus-effort thinking.
- LO6: Plan a sprint, estimate work, and generate a release roadmap and plan with AI support.
- LO7: Summarise stand-ups and track sprint progress with AI while keeping the team's judgement in the loop.
- LO8: Identify risks, blockers and dependencies with AI and plan mitigations and escalations.
- LO9: Assist documentation, communication, quality and testing across the sprint with AI.
- LO10: Generate status reports and a delivery dashboard for different stakeholders with AI.
- LO11: Analyse velocity and delivery metrics with AI to surface trends and honest insights.
- LO12: Run an AI-assisted retrospective and turn its output into a concrete continuous-improvement plan.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.

- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.

Course Schedule

Day 1 — Stand up the Tempo 2.0 delivery on an AI toolkit — set up ChatGPT, Claude and Gemini for agile work, build a reusable prompt library and a responsible-AI checklist, then draft and refine the user stories, groom and prioritise the product backlog, and plan the first sprint with a release roadmap

Time	Duration	Topic / Activity
9:00–9:20	20 min	Welcome, course introduction and ground rules, and setup: signing in to ChatGPT, Claude and Gemini and confirming each assistant is ready for the labs
9:20–10:00	40 min	TOPIC 01 — Getting Started with Generative AI for Agile: introduction to Agile, Scrum and generative AI; setting up AI tools for agile project management; effective prompting for agile tasks; responsible and human-in-the-loop use of AI (concepts + live demo)
10:00–10:45	45 min	Hands-on: Lab 1: Set Up Your AI Toolkit for Agile Project Management
10:45–11:00	15 min	Tea break
11:00–13:00	120 min	Hands-on: Lab 2: Write Effective Prompts and Build an Agile Prompt Library; Lab 3: Apply Responsible, Human-in-the-Loop AI Practices
13:00–14:00	60 min	Lunch break
14:00–14:30	30 min	TOPIC 02 — AI for Backlogs, User Stories and Planning: drafting and refining user stories and acceptance criteria; grooming and prioritising the backlog with AI; sprint planning and estimation support; generating roadmaps and release plans (concepts + live demo)
14:30–16:15	105 min	Hands-on: Lab 4: Draft and Refine User Stories and Acceptance Criteria; Lab 5: Groom and Prioritise the Product Backlog with AI
16:15–16:30	15 min	Tea break

16:30–17:50	80 min	Hands-on: Lab 6: Plan the Sprint, Estimate, and Build the Release Roadmap
17:50–18:00	10 min	Day 1 recap: the AI toolkit, the groomed and prioritised backlog, the first sprint plan and roadmap, and Q&A

Total scheduled time: 480 minutes (8 hours) excluding lunch — of which 450 minutes (7.5 hours) are instructional, plus 30 minutes of tea breaks.

Day 2 — Run and close out the Tempo 2.0 sprints with AI — summarise stand-ups and track progress, surface risks, blockers and dependencies, assist documentation, communication and testing, then generate status reports and a dashboard, analyse velocity, and run an AI-assisted retrospective that drives a real continuous-improvement plan

Time	Duration	Topic / Activity
9:00–9:15	15 min	Day 1 recap, questions, and Day 2 introduction: from planning the sprint to running and closing it out with AI
9:15–9:55	40 min	TOPIC 03 — AI for Sprints, Standups and Delivery: summarising stand-ups and tracking progress; identifying risks, blockers and dependencies with AI; assisting documentation and communication; supporting quality, testing and delivery (concepts + live demo)
9:55–10:45	50 min	Hands-on: Lab 7: Summarise Stand-ups and Track Sprint Progress
10:45–11:00	15 min	Tea break
11:00–13:00	120 min	Hands-on: Lab 8: Identify Risks, Blockers and Dependencies with AI; Lab 9: Assist Documentation, Communication and Testing
13:00–14:00	60 min	Lunch break
14:00–14:30	30 min	TOPIC 04 — AI for Reporting, Retrospectives and Improvement: generating status reports and dashboards; analysing velocity and metrics with AI; running AI-assisted retrospectives; driving continuous improvement (concepts + live demo)
14:30–16:15	105 min	Hands-on: Lab 10: Generate Status Reports and a Delivery Dashboard; Lab 11: Analyse Velocity and Metrics with AI
16:15–16:30	15 min	Tea break

16:30–17:50	80 min	Hands-on: Lab 12: Run an AI-Assisted Retrospective and Plan Continuous Improvement
17:50–18:00	10 min	Course wrap-up: the end-to-end Tempo 2.0 Agile AI Playbook, responsible-AI recap, and next steps

Total scheduled time: 480 minutes (8 hours) excluding lunch — of which 450 minutes (7.5 hours) are instructional, plus 30 minutes of tea breaks.

Lab Reference (aligned to course topics)

Topic	Coverage	Labs
Topic 01: Getting Started with Generative AI for Agile	25%	Lab 1, Lab 2, Lab 3
Topic 02: AI for Backlogs, User Stories and Planning	25%	Lab 4, Lab 5, Lab 6
Topic 03: AI for Sprints, Standups and Delivery	25%	Lab 7, Lab 8, Lab 9
Topic 04: AI for Reporting, Retrospectives and Improvement	25%	Lab 10, Lab 11, Lab 12
